PROFILE

Creative and detail-oriented Fullstack Developer with a solid foundation in building modern, responsive web applications using **Next.js**, **React**, **Tailwind CSS**, and **TypeScript**. Skilled in integrating APIs, managing state with **React Query** and **Redux**, and implementing secure authentication flows using tools like **Auth0**. Proficient in full-stack workflows with **Prisma** and **PostgreSQL**, and currently expanding backend expertise with **Node.js**, **Supabase**, and **Drizzle ORM**.

Strong advocate for clean, accessible UI/UX and design systems, with hands-on experience using component libraries like **ShadCN UI** and custom-built Tailwind design systems. Adept at simplifying complex frontend concepts through teaching, having taught **JavaScript** and **React** at the tech school **Decipher Innovate**.

Passionate about continuous learning and committed to crafting robust, high-performance web experiences.

SKILLS

Programming Languages

- HTML
- CSS
- JavaScript
- Typescript

Database Management

- Postgresql
- Prisma
- Supabase

Frameworks/Libraries

- React
- Next.Js
- TailwindCss
- GSAP
- Framer Motion
- React Query
- ShadCN-UI
- Restful API
- Git and GitHub

Soft Skills

- Good communication skills
- Problem solving and analytical skills
- Team player
- Can work under pressure
- Always willing to learn and improve

PROFESSIONAL EXPERIENCE

Technical Instructor

Decipher Innovate

04/2025 – 07/2025

Edo State, Nigeria

- Conducted hands-on training for web development students, focusing on Javascript and React.
- Designed and Delivered structured and interactive lessons covering key javascript concepts.
- Provided practical exercises and projects to reinforce learning and ensure students could apply concepts effectively.
- Guided students in debugging, problem-solving and writing clean, efficient code.
- Created an interactive learning environment, encouraging collaboration and active participation.
- Worked well with my other colleagues in ensuring the students had the best experience possible.

- Assess students' progress through practical evaluations, ensuring they gained a strong foundation in web development.

PROJECTS

Jobify

Lead Developer

- A web app for job hunters. It helps them take records of all the jobs they applied for, and categorizes them as either rejected, pending or awaiting interviews.
- Designed to be user-friendly ensuring easy navigation for everyone.
- A fullstack app using prisma and postgresql in a one-many relationship.
- Also contains login and logout features using clerk, form validations and light and dark mode.

Luxe by deba

lead developer

- Personal project built for my sister who sells clothing accessories.
- An ecommerce website designed to be user-friendly with admin features and featured products.
- A fullstack web app for buying and selling using stripe, clerk for authentication, redux for calculations and even filters for easy navigation and finding of products.

Space Tourism

Lead developer

- Frontend web app that gives you the space experience you deserve.
- It is a frontendmentor.io  project. All resources and figma files were obtained from there.
- Tools used include react, nextjs, shadCN-UI, GSAP.
- Aimed at making me a better designer and improve design system

EDUCATION

Bachelor's Degree in Electrical/Electronics Engineering

University of Benin

09/2016 – 09/2022

Benin City, Nigeria

React Course

Udemy

06/2022 – 08/2022
